Aranza Isea

Senior Product Designer · AI Products

Buenos Aires, Argentina (Remote, GMT-3) | aranzaisea@gmail.com | linkedin.com/in/aranzaisea | aranzaisea.netlify.app

SUMMARY

Senior Product Designer with 10+ years of experience in product design, UX/UI design and user research, specialized in AI products: generative AI copilots, AI agents and human-in-the-loop workflows for enterprise B2B SaaS in insurance, fintech and e-commerce. I design the AI's behavior as carefully as the screens (autonomy levels, confidence thresholds, failure states and audit trails) so people stay in control. Most recently I owned an AI claims copilot for ~500 insurance adjusters end to end, from user research to developer handoff: −68% claim resolution time and 90%+ adoption.

EXPERIENCE

Career Break — Sabbatical 2025 – Present · Buenos Aires

- Planned one-year sabbatical, now available to start immediately. Documented four shipped products as portfolio case studies, designed an independent AI product concept (Numi) and completed IBM Generative AI certifications.

Product Designer, AI Products — Perficient Jan 2024 – 2025 · Remote

- Owned ClaimPro end to end, a generative AI claims copilot for a US insurance claims administrator: user research, user flows, AI behavior design, prototyping and developer handoff.
- Interviewed 20 users (~15 claims adjusters and 5 supervisors), ran a heuristic evaluation of the legacy tool, desk research and a competitive benchmark, and mapped the as-is service blueprint.
- Tested the prototype with 10 adjusters and 5 supervisors; testing showed the first AI was too cautious, so I redesigned it into a proactive copilot with an AI-prioritized Workspace, AI document intake with per-field confidence and sources, and an execution plan for every claim.
- Designed autonomy as a configurable setting: the AI drafts and a person approves by default, and any field below 85% confidence goes to human review, with a full audit trail.
- Collaborated cross-functionally with a product manager, a business analyst, 4 developers, QA and 2 visual designers over six months.
- Results: −68% claim resolution time (client-reported, 3 months) and 90%+ adoption among ~500 adjusters within two months of launch; it became the company standard.
- Designed Vantage, a launched multi-agent AI platform for a neobank's anti-money-laundering (AML) compliance team: four AI agents gather context, score risk, check sanctions lists and draft the recommendation, and a named analyst signs every decision.

Senior UX/UI Designer — Perficient Jan 2022 – Jan 2024 · Remote

- Product designer of Off Dep Business, a self-service B2B e-commerce purchasing platform for a major US office-supply retailer: user research, user flows, UI and prototyping over six months.
- Ran 20 interviews with Business buyers and turned the findings into roles, budgets and approvals inside one company account, plus an AI purchasing assistant and approval verdicts that show confidence, budget impact and policy checks.
- Results after launch: +65% Business accounts, +56% B2B sales and +47% account retention.
- Lead Product Designer of Club Rumbo, a fuel-station loyalty app MVP shipped on iOS and Android in one month: ran 20 driver interviews and stakeholder workshops, set the scope and defined the flows; the final UI was shared with a second designer.
- Enterprise SaaS, admin systems and data-heavy workflows, including work for a global logistics company.

Senior Visual Designer — Perficient Oct 2019 – Jan 2022 · Buenos Aires

- Built and scaled Perficient's Advanced Design System: visual standards and a reusable component library that improved consistency and design-to-development handoff.

Product Designer — Distrito Moda Apr 2017 – Jan 2019 · Buenos Aires

- Designed a multi-sided fashion e-commerce platform for retail and wholesale buyers end to end, from user research to an implementation-ready handoff.

UX Designer — Tsserapp Mar 2015 – Jan 2017 · Venezuela

SELECTED PROJECTS

Full case studies: aranzaisea.netlify.app

- **ClaimPro:** Generative AI claims copilot for insurance adjusters, human-in-the-loop by design. Launched; −68% resolution time.
- **Off Dep Business:** AI-assisted B2B purchasing with budgets and approvals. Launched; +56% B2B sales.
- **Vantage:** Multi-agent AI platform for AML compliance at a neobank. Launched.
- **Club Rumbo:** Fuel-station loyalty app MVP for iOS and Android, shipped in one month. Launched.
- **Relay:** Enterprise AI agent copilot with role permissions, autonomy policy and audit log. Launched.
- **Numi:** AI meal planner for iOS, evaluated against Microsoft's Human-AI (HAX) guidelines. Independent concept, 2026.

SKILLS

AI product design: Generative AI, LLM-powered products, AI agents, multi-agent workflows, AI copilots, human-in-the-loop design, autonomy levels, confidence and uncertainty UX, AI failure states, explainability, audit trails, Human-AI (HAX) guidelines, prompt engineering

UX research: User research, user interviews, usability testing, heuristic evaluation, affinity mapping, journey mapping, service blueprints, personas, competitive analysis, stakeholder workshops

Product & UX design: Product design, UX/UI design, interaction design, information architecture, user flows, wireframing, prototyping, design systems, component libraries, developer handoff, design thinking, UX strategy

Tools: Figma, FigJam, Photoshop, Illustrator, Notion, Hotjar, Claude, ChatGPT, Cursor, n8n

Domains: Enterprise B2B SaaS, insurance (insurtech), fintech and AML compliance, B2B e-commerce, mobile apps (iOS and Android)

EDUCATION & CERTIFICATIONS

- Postgraduate Diploma in Product Design
- Bachelor's Degree in Graphic Design
- Generative AI: Introduction and Applications — IBM
- Develop Generative AI Applications: Get Started — IBM
- AI Automation Course
