Aranza Isea

Senior Product Designer | UX/UI Designer | AI Products

Buenos Aires, Argentina (Remote, GMT-3) | +54 9 11 6688-4789 | aranzaisea@gmail.com | linkedin.com/in/aranzaiseaux | aranzaisea.netlify.app

SUMMARY

I design AI-powered products that people actually trust and adopt - turning ambiguous, high-stakes problems in regulated industries into interfaces that ship and stick. 10+ years in product design, UX research, and design systems, most recently leading an AI claims copilot that cut resolution time by 68% and reached 90%+ adoption among approximately 500 users.

CORE COMPETENCIES

Design & Research: Product & UX/UI Design, Design Systems, Mobile Design (iOS/Android), Accessibility (WCAG), User Research, Usability Testing, Service Blueprints, Developer Handoff

AI Product Design: Generative AI, AI Agents, AI Copilots, Human-in-the-Loop Design, Autonomy Levels, Confidence & Uncertainty UX, Explainability, Audit Trails

Tools: Figma, Figma Make, FigJam, Miro, Jira, Adobe Creative Cloud, Hotjar, Claude, Claude Code, ChatGPT, Cursor, n8n

Domains: B2B E-commerce, Enterprise SaaS, Insurtech, Fintech & AML, Loyalty & Mobile Apps

EXPERIENCE

Senior Product Designer, AI Products

Perficient | Remote | January 2024 - August 2025

- Owned ClaimPro end to end: a generative AI claims copilot for a US insurance claims administrator, from research through developer handoff.
- Led discovery - 20 interviews, a heuristic evaluation, competitive benchmark, and service blueprint - then redesigned a too-cautious AI into a proactive copilot with per-field confidence and sources.
- Designed autonomy as a configurable setting: AI drafts, a person approves by default, and anything below 85% confidence routes to human review, with a full audit trail.
- Results: 68% reduction in claim resolution time and 90%+ adoption among approximately 500 adjusters within two months; became the company standard.
- Also designed Vantage, a launched multi-agent AML compliance platform: four AI agents assess risk and draft recommendations for a named analyst to sign off.

Senior UX/UI Designer

Perficient | Remote | January 2022 - January 2024

- Product designer of Off Dep Business, a self-service B2B e-commerce platform for a major US office-supply retailer.
- Ran 20 buyer interviews and designed roles, budgets, and approvals per account, plus an AI purchasing assistant with confidence and policy checks.
- Results (client-reported): 56% increase in B2B sales, 65% increase in Business accounts, 47% increase in account retention.
- Lead designer of Club Rumbo, a fuel-station loyalty app MVP shipped on iOS and Android in one month, from driver research to final UI.

Senior Visual Designer

Perficient | Buenos Aires | October 2019 - January 2022

- Built and scaled Perficient's Advanced Design System - visual standards and components adopted across multiple product teams.

Product Designer

Distrito Moda | Buenos Aires | April 2017 - January 2019

- Designed a multi-sided fashion e-commerce platform end to end, from user research to implementation-ready handoff.

Junior UX/UI Designer

Tsserapp | Venezuela | March 2015 - January 2017

- Transitioned from graphic design into UX/UI, designing wireframes and interfaces for web and mobile apps.

EDUCATION

Diploma in Product Design - Coderhouse January 2024 - January 2026

Specialization in User Experience (UX) - Universidad Rafael Belloso Chacin 2013 - 2015

Bachelor's Degree in Graphic Design - Universidad Rafael Belloso Chacin 2008 - 2012

CERTIFICATIONS

AI Automation - Coderhouse September 2026

Develop Generative AI Applications: Get Started - IBM May 2026

Generative AI: Introduction and Applications - IBM April 2026

Languages: Spanish (Native), English (C1, Professional Working Proficiency)

Note: Currently completing a planned one-year sabbatical (Product Design diploma, AI certifications) - available immediately.
