Aranza Isea

Senior Product Designer | UX/UI Designer | AI Products

Buenos Aires, Argentina (Remote, GMT-3) | +54 9 11 6688-4789 | aranzaisea@gmail.com | linkedin.com/in/aranzaiseaux | aranzaisea.netlify.app

SUMMARY

I design AI-powered products that people actually trust and adopt, turning ambiguous, high-stakes problems in regulated industries into interfaces that ship and stick. 10+ years in product design, UX research and design systems. Most recently I led an AI claims copilot that cut claim resolution time by 68% and reached 90%+ adoption among approximately 500 users. Available immediately.

CORE COMPETENCIES

Design & Research: Product & UX/UI Design, Design Systems, Mobile Design (iOS/Android), Accessibility (WCAG), User Research, Usability Testing, A/B Testing, Service Blueprints, Developer Handoff, Agile/Scrum

AI Product Design: Generative AI, AI Agents, AI Copilots, Human-in-the-Loop Design, Autonomy Levels, Confidence & Uncertainty UX, Explainability, Audit Trails

Tools: Figma, Figma Make, FigJam, Miro, Jira, Adobe Creative Cloud, Hotjar, Claude, Claude Code, ChatGPT, Cursor, n8n

Domains: B2B E-commerce, Enterprise SaaS, Insurtech, Fintech & AML, Loyalty & Mobile Apps

Languages: Spanish (Native) | English (C1, Professional Working Proficiency)

EXPERIENCE

Senior Product Designer, AI Products

Perficient | Remote | January 2024 - August 2026

- Owned ClaimPro end to end: a generative AI claims copilot for a US insurance claims administrator, from research to developer handoff.
- Led discovery (20 interviews, a heuristic evaluation, a competitive benchmark and a service blueprint), then redesigned a too-cautious AI into a proactive copilot with per-field confidence and sources.
- Designed autonomy as a configurable setting: the AI drafts, a person approves by default, and any field below 85% confidence routes to human review, with a full audit trail.
- Results: 68% reduction in claim resolution time, measured over three months; 90%+ adoption among approximately 500 adjusters within two months. ClaimPro became the company standard.
- Also designed Vantage, a launched multi-agent AML compliance platform: four AI agents assess risk and draft recommendations for a named analyst to sign off.

Senior UX/UI Designer

Perficient | Remote | January 2022 - January 2024

- Product designer of Off Dep Business, a self-service B2B e-commerce platform for a major US office-supply retailer.
- Ran 20 buyer interviews and designed roles, budgets and approvals per account, plus an AI purchasing assistant with confidence and policy checks.
- Results (client-reported): 56% increase in B2B sales, 65% increase in Business accounts, 47% increase in account retention.
- Lead designer of Club Rumbo, a fuel-station loyalty app MVP shipped on iOS and Android in one month.

Senior Visual Designer

Perficient | Buenos Aires | October 2019 - January 2022

- Led visual design and built Perficient's Advanced Design System: visual standards and components adopted across product teams.

Product Designer

Distrito Moda | Buenos Aires | April 2017 - January 2019

- Designed a multi-sided fashion e-commerce platform end to end, from user research to implementation-ready handoff.

Junior UX/UI Designer

Tsserapp | Venezuela | March 2015 - January 2017

- Moved from graphic design into UX/UI, designing wireframes and interfaces for web and mobile apps.

EDUCATION

Diploma in Product Design - Coderhouse | January 2024 - January 2026
Specialization in User Experience (UX) - Universidad Rafael Belloso Chacín | 2013 - 2015
Bachelor's Degree in Graphic Design - Universidad Rafael Belloso Chacín | 2008 - 2012

CERTIFICATIONS

AI Automation - Coderhouse | September 2026
Develop Generative AI Applications: Get Started - IBM | May 2026
Generative AI: Introduction and Applications - IBM | April 2026
